Take my sins and wash them away Teach me how to pray I've been stranded here in the dark Take these walls away I've been swimming in the ocean Till I'm almost drowned Give me something I can believe in Teach me how to pray And we can do drugs and we can smoke weed and we can drink whiskey Yeah we can get high and we can get stoned And we can sniff glue and we can do E and we can drop acid Forever be lost with no way home Yeah we can run and we can hide But we won't find the answers If you go down then you'll get help along the way But if you wanna save your soul Then we should travel all together And make the devil pray Ooo, save my... Ooo, save my... 000, save my... Devil's here to fool ya Ooo, save my... Ooo, save my... 000, save my... Devil's here to fool ya Ooo, save my... Ooo, save my... 000, save my... Devil's here to fool ya Ooo, save my... Ooo, save my... 000, save my... Devil's here to fool ya Mother Mary can't you help me Cause I've gone astray All the angels that were around me Have all flown away The ground beneath my feet's getting warmer Lucifer is near Holding on, but I'm getting weaker Watch me disappear And we can do drugs and we can smoke weed and we can drink whiskey Yeah we can get high and we can get stoned And we can sniff glue and we can do E and we can drop acid Forever be lost with no way home Yeah we can run and we can hide But we won't find the answers If you go down then you'll get help along the way

But if you wanna save your soul Then we could travel all together

## And make the devil pray

Ooo... Sing hallelujah
Ooo... Save my soul

Ooo... the devil's here to fool ya

Until my story's told

I said ooo... sing hallelujah Ooo... save my soul Ooo... the devil's here to fool ya Until my story's told

Until my story's told
