

Kaleidoscope

MAE

Love, take us all to task
Life, so full of broken glass
With mirrors in mind
We can lose our way in shadows
Only love only light

Light it up for me now can you, love?
Bright as you can be I'm not giving up
Give me all your glow
Colors show
Collide us both

Life
Long, deep, wide
Short, sweet, vapor blink of eye
Take care of each other
It's easy if we try
Let the colors come alive
Only love and only light

Can you imagine or remember the first time you ever saw a plane
?
Where you'd go who you'd know every grand finale on display
Now for the moment please consider the same thing galaxies away
1, 2, 3, you and me, any postcard we'd sign our names

If our souls are all connected
When the stars collide it's light on course

I never knew more than two
Until you took me past it
Black and white
Speed of light
And now the colors are all changing too
And still we go faster

When our souls are all connected
Every wrong we right is light on course
It's light of course

Light it up for me now can you, love?
Bright as you can be I'm not giving up
Give us all your glow
