

# Vibrations

Maejor Ali

Lately you've been making changes I see you  
Maybe you misplacing anger  
I need to be committed when I listen  
Your heartbeat is the rhythm of religion to me

Rolling, rolling, rolling we went on a wave  
Living in the moment was the only way

What goes around comes around  
It's been that way forever  
What goes up must come down  
Before the pain turns to pleasure  
Everything comes in time  
Everything comes in time

Always chasing inspiration where she go  
Holding onto Revelations I need those  
So consistent in my vision  
The feeling has potential for addiction to me

Rolling, rolling, rolling we went on a wave  
Running from the devil when we needed faith

What goes around comes around  
It's been that way forever  
What goes up must come down  
Before the pain turns to pleasure  
Everything comes in time  
Everything comes in time

When your heart don't look down  
Baby release the pressure  
When it's all falling down put yourself together  
Everything comes in time  
Everything comes in time
