

## deprecating

Maggie Lindemann

Manipulation nightmares lucid  
Deprecating mind pollution  
Living while you're disapproving  
Hold your guard, hold your guard

How can you sleep in the dark  
When you're killing someone that is harmless  
Invading my mind when I'm conscious  
Believe in the bullshit you're lost in  
How could you lie when you promised  
Stand on the edge and you're falling  
Hit the ground hard, get your head split  
So fucking cold now I'm frostbit  
Delusion and pain, tear the pulse from the socket  
Stuck on replay, rewind while you're watching  
I'll show you the day that you should have said sorry  
Now karma's a bitch, you're alone in your body

If you love me, would you let me go  
If you loved me, you would let it show

Yeah suffocating  
Suffocating

Manipulation nightmares lucid  
Deprecating mind pollution  
Living while you're disapproving  
Hold your guard, hold your guard

Talkin' like you're dignified  
Words that cut like jagged knives  
Rip my heart, I twist my mind  
Killed a soul, a homicide

If you love me, would you let me go  
If you loved me, you would let it show

Yeah suffocating  
Suffocating  
Suffocating
