

Vanish

Maggie Rose

I think that I could forgive you
Even though you didn't ask
I'd travel miles to reach you
But you look so comfortable in the past
And it hurts to look back

People come and people go
And over time I've learned
To leave it there, leave it there
But the way you up and vanished makes me wonder
If you ever loved me
Or did it happen only in my mind

It's crazy just how well you knew me
I let you get under my skin
It's crazy you chose to confuse me
With someone I've never been
Did you even know me back then

People come and people go
Over time I've learned
To leave it there, leave it there
But the way you up and vanished makes me wonder
If you ever loved me
Or did it happen only in my mind

In my mind
In my mind
At least I thought I'd know the reasons why
You had to cut the tie

People come and people go
And over time I've learned
To leave it there, leave it there
But the way you up and vanished makes me wonder
If you ever loved me
Or did it happen only in my mind
In my mind
In my mind
In my mind
At least I thought I'd know the reasons why
You had to cut the tie
