

Remember

Magnum

She wore black and a veil on her face
Walked alone every mile
Closed her eyes and she looked out of place
Then she started to smile
Yeah

Remember those bright lights
When people danced together
Remember those long nights
The famous and the beggars
They fell under the same spell
Their flesh and blood the same
Remember those highlights
Just like a burning flame

The old man turned the corner on life
Still had music to hear
Live or die yeah he still had the fight
After all of these years
Yeah

Remember those bright lights
When people danced together
Remember those long nights
The famous and the beggars
They fell under the same spell
Their flesh and blood the same
Remember those highlights
Just like a burning flame

Playing records that no one had heard
The DJ was happy in his own world

They fell under the same spell
Their flesh and blood the same
Remember those highlights
Just like a burning flame

Remember those bright lights
Remember those long nights
They fell under the same spell
Their flesh and blood the same
Remember, remember
Remember
