

# Run Into the Shadows

Magnum

Don't want to play your war games  
And see those bullets fly  
To end in desolation  
Before my very eyes

Respect lose it forever  
You'll find it was never lost  
You know we're not so clever  
A fool's blood on hands they never washed

Dark clouds are comin'  
They're black today

There's no place that you can hide  
For sure  
Run into the shadows through that door  
When things are too hot to touch  
Beware  
Run into the shadows, have a care

Some people dream of violence  
Some people never cry  
Some people's lives are empty  
And some just walk on by

Fall down stuck in the middle  
Now please what d'you have to say?  
I've read life is a riddle  
Someone, someone's got to pay

The music carries  
From far away

There's no place that you can hide  
For sure  
Run into the shadows through that door  
When things are too hot to touch  
Beware  
Run into the shadows, have a care

Someone is sayin'  
Our days are numbered  
I hope they've got it wrong again  
But don't start prayin'  
Don't weep, don't wonder  
You know we'll have to start, but when?

They said there's no chance  
But let's pretend

There's no place that you can hide  
For sure  
Run into the shadows through that door  
When things are too hot to touch  
Beware  
Run into the shadows, have a care

There's no place that you can hide  
For sure  
Run into the shadows through that door  
When things are too hot to touch  
Beware  
Run into the shadows, have a care
