Major Lazer

Now baby, can't tell you why, why we  
Ain't getting high no more, try so hard  
There's something I've been feeling and we're lonely  
But we never used to be  
Either we're arguing or you leave  
We both know something's missing

I've been holding on  
Holding on to nothing  
You don't care too much  
And it's obvious that you're already gone  
So unleash your weapon  
Aim it at my chest and

If our love is a drug, you're the one with a trigger  
Shoot me down, shoot me down, I don't wanna remember you  
(Yeah) Yeah, yeah, yeah  
Don't try to change your mind when the blood is on your hands  
Shoot me down, shoot me down, I don't wanna remember, yeah, yeah

Shoot me down, shoot me down, you're the one with a trigger  
Hey, hey, hey

Soul to soul, we used to rock so slow  
I felt your blood boil and my heartbeat rush  
You freed me, past is slipping, there's no one left  
Go on and hold your breath  
Say that you want me but you don't want stress  
I can't say I feel different

I've been holding on  
Holding on to nothing  
You don't care too much  
And it's obvious that you're already gone  
So unleash your weapon  
Aim it at my chest and

If our love is a drug you're the one with a trigger  
Shoot me down, shoot me down, I don't wanna remember you  
(Don't wanna remember) Yeah, yeah, yeah  
Don't try to change your mind when the blood is on your hands  
Shoot me down, shoot me down, I don't wanna remember, yeah, yeah

Shoot me down, shoot me down, you're the one with a trigger  
Hey, hey, hey
