

## Pillow Talk

Major League

You left on bad terms again  
I know this routine all too well  
I'm hung up on what you said  
And nobody wants to be this way

You say to me, you want to see the world here someday  
Give me time to make a change we both want to see  
I'm not everything, that you need  
Wait for me and everything will soon be okay

My body fell apart in your bed  
In pieces I broke right where you lay

You say to me, you want to see the world here someday  
Give me time to make a change we both want to see  
I'm not everything, that you need  
Wait for me and everything will soon be okay

Please don't ever act like you're afraid  
You know I always loved you just the same, dear  
We'll chalk all this up  
To petty pillow talk  
And lay here until we both get our way  
Honestly and endlessly  
All the way down  
Take from me everything  
All the way down

You say to me, you want to see the world here someday  
Give me time to make a change we both want to see  
I'm not everything, that you need  
Wait for me and everything will soon be okay
