

# Closer

Makari

You know I tried to replace  
All of your doubts  
To cut them out

A subtle glance at your face  
To find out the truth  
Do you feel the same?

You've got me strung out spinning  
On a track with no way out  
I can't slow down  
I can't slow down

I'm spinning on a track with no way out

We're like an ember turned into a flame  
We shine our brightest in the pouring rain  
So take my hand and pull me closer  
When you're far away  
Cause we've got something that will never fade

Don't act like you're not confused  
Pretend you know it's all going down  
Cause I'm not bound by those rules  
So follow me now, I won't let you drown

Look into my eyes, see through my disguise  
And we can bury your doubts  
There's more to our short lives than this eternal fight  
Where we are not enough

We're like an ember turned into a flame  
We shine our brightest in the pouring rain  
So take my hand and pull me closer  
When you're far away  
Cause we've got something that will never fade

We roam these streets into the night  
I kiss your cheek, won't say goodbye  
So take my hand and pull me closer  
When you're far away  
Cause we've got something that will never fade

Now we're falling out  
Yeah we're falling out again  
And now you're running out  
Yeah you're running out again

We're like an ember turned into a flame  
We shine our brightest in the pouring rain  
So take my hand and pull me closer  
When you're far away  
Cause we've got something that will never fade

We roam these streets into the night  
I kiss your cheek, won't say goodbye  
So take my hand and pull me closer

When you're far away  
Cause we've got something that will never fade  
Cause we've got something that will never fade  
Cause we've got something that will never fade
