

Tidal Wave

Makari

The hazy air
Blows my way to surround me
With warmth and hope

A hazel stare
Steals a glimpse of the sorrows
Within my soul

Push me away and I'll come running back
Each night we're apart feels like a heart attack

But I'm not scared
Cause when the weathers bad
I know that we can

Brave this storm together
In reverie we'll always be

It might last forever
Hold on to me and we'll ride the tidal wave

And I know, I know that the world's dim
But with you, I don't feel the darkness
So stay close
Surely we can light the way

Brave this storm together
In reverie we'll always be

It might last forever
Hold on to me and we'll ride the tidal wave

So if you sing high maybe I'll sing low
Through blurry eyes I can be your glow

Until brighter weather
Hold on to me and we'll ride the tidal wave

(When the weather's bad we can...)

Brave this storm together
In reverie we'll always be

It might last forever
Hold on to me and we'll ride the tidal wave

So if you sing high maybe I'll sing low
Through blurry eyes I can be your glow

Until brighter weather
Hold on to me and we'll ride the tidal wave
