Oscillator

Make Them Suffer

We've all signed a death wish, through glass we sold our souls
And waivered the privilege to retain control
Oscillator

Everybody wants to cure their pain
But nobody wants to cure their sickness
Everybody wants to fill their veins
With numbers and digits
Everybody let the signal flood those dopamine receptors
Everybody feel the system pump its pulse into your centre

Yeah, delete, delete, esc
Should've pulled the plug at the get go
Yeah, delete, delete, esc
Give in to the drug of the bit code
Let the signal flood those dopamine receptors
Feel the system pump its pulse into your centre

I know you're not well (I watched you sink)
Sink into your shell (Turn into)
Someone else, but you can't ask for help
You've waged a war against yourself
Oscillator

The signal takes its course
It's coursing through your veins
You watch your world distort
You find yourself constrained, yeah

I know you're not well (I watched you sink)
Sink into your shell (Turn into)
Someone else, but you can't ask for help
You've waged a war against yourself
Yourself

Everybody let the signal flood those dopamine receptors
Everybody feel the system pump to the pulse of your depression

Yeah
You feel the frequency spike your neurotransmission
Bound by the privilege of your very own glass prison

(I watched you sink)
Sink into your shell (Turn into)
Someone else, but you can't ask for help
You've waged a war against yourself
I watched you sink into your shell
Turn into someone else but you can't ask for help
You've waged a war against yourself
Oscillator

Let the signal flood those dopamine receptors
When the frequency hits, fear the oscillator
