

Tether

Make Them Suffer

Pick up the ones who break
You've got to pull weight
Pain doesn't last forever
Forgive the ones that treat you worst
Let them project their hate
Don't be swayed
Look, we all feel the pressure
And the ones who break are hurt the most

This is an offering
To make amends
To forget everything
In your past
This is an offering
To make amends
To forget everything
So you can

Feel what I feel
I'll let you tether onto me
So you can feel what I feel
And you'll be better off, better off

This is an offering
A chance to make amends

Centre your purpose
We've all got some regrets
Leave all that holds you back in the past
Breathe, just breathe
Follow your compass before the sun has set
Put every unturned stone to the test

Tell me you want it
Tell me you want it
Tell me you need it
Tell me you need it
And once you get it just rinse and repeat it
Tell me you love it
Tell me you love it
Tell me you need it
Once you get it just rinse and repeat it

I know you're bitter
And how it hurts
To pull the trigger
And bare the worst
Tell me you want it
Tell me you need it

So you can feel what I feel
I'll let you tether on to me
So you can feel what I feel
And you'll be better off, better off

Go
Through the framework of dreams and further clouds, be delivered

Find peace and you will be found
