

You only show up when I need you  
'Course, I can't afford you anymore, nah nah  
Making everything easier  
You caught the tip of my tongue, yet I don't wanna talk  
But she glow in the dark  
My moments come and gone, now we're walking on Mars  
It's hitting me hard  
While the nights still young, oh, baby we should both get lost

While the nights still young we should both get lost

I I I think I feel it now  
It's scaring me but part of me is singing like woah  
Just a thought, little Ocelot, pounce again

My moments come and gone, now we're walking on Mars  
While the nights still young, oh, maybe we should both get lost  
My moments come and gone, now we're walking on Mars  
Watcha' got? Little Ocelot, pounce again

Watcha' got? Little Ocelot, pounce again  
My moments come, now we're walking on Mars

You only show up when I need you  
'Course, I can't afford you anymore, nah nah  
Making everything easier  
You caught the tip of my tongue  
While the nights still young, oh, maybe we should both get lost

Watcha' got? Little Ocelot, pounce again  
Now we're walking on Mars  
Watcha' got? Little Ocelot, pounce again
