

## Ovarian Incubation

### Malignancy

Unresponsive stimulus  
Influx deters ovum production  
Corruption of blood supply  
Corpuscles can not carry  
Nutrient rich oxygen

Sustaining infantile cells  
Impossible to flourish  
Vagina not equipped for incubation  
Alternate means necessary to procreate  
Subject prepared for vitro fertilization

Grotesque misuse of another species  
Impregnate suitable host  
Conception through a test tube  
Gestating a foreign embryo  
Made to carry unwanted pregnancy  
Observing while nature runs it's course

Leukocytes attack unborn  
Pumping forth mutagen  
Weak fetus absorbs agent

Spreading throughout premature unborn  
Overcome by cellular changes  
Corruption of blood supply  
Under developed cannot survive

Induced labor, stimulation  
Uterine contractions  
Rupturing interior membranes  
Facilitate artificial birth  
Freakish thing spills forth  
Creation of new genus species
