

Skeletal Integrity

Malignancy

Radiation pollutes, a hidden guise
Activation of dormant pestilence
Undetectable force that ravages
Complicates abilities for defense

Neglected, left unchecked rots from the source
Weakness crumbles within
Complication of risk factors determine the outcome
Patient outcry for swift action is met with skepticism
Viable donor needed for immediate transplant

Searching for the perfect candidate to ultimately
neutralize the disease
Information is never forthcoming especially in the wake
of disaster
Numbing all your feeling

Hording factions are engaged in this battle to crush the
antagonist
Renewing the chances of survival with the breakthroughs
of science
That promise to rid us of disease
Placing our trust
Hopeful we fight until our last breath
