

## For Real

Mallrat

Falling asleep, dream sweet in the passenger seat  
I am if you are, so we could get something to eat  
I know a place where there's nothing to see  
So we can just talk 'bout what we want to be  
Work it out, we can work it out, aye  
But time's not a thing  
So roll down the windows and we can just sing  
Like la la la, not a worry in the world and blah blah blah (blah)  
It's not really true  
But right now it is when I'm right here with you  
We both look a mess but we couldn't care less  
'Bout the way that we dress  
Late to the party  
I hope we offend somebody

And you didn't even wanna die once this week  
And when you're around I feel less of a freak  
And when you smile for real, you make me smile for real  
Don't care if it's night or it's day  
Let's get some coffee so we stay awake  
And when you smile for real you make me smile for real  
And when you smile for real you make me smile for real  
And when you smile for real you make me smile for real  
And when you smile for real you make me smile for real

Falling easily  
How 'bout you take a seat with me  
You're worrying me  
And you shouldn't say sorry to me  
So something has changed since they got in the way  
I just shouldn't say what I'm wanting to say  
Your makeup's running like you've run in the rain  
And it's not the best way to be ending a day  
Nothing to say, disregard what we say  
Now I'm lost and alone in this big white house on a hill  
Some rude boy calls your name  
I don't remember why we came

'Cause you didn't even wanna die once this week  
And when you're around I feel less of a freak  
And when you smile for real you make me smile for real  
You're tryna find your heels, your smiling isn't real  
Falling asleep, dream sweet in the passenger seat  
Falling asleep, dream sweet in the passenger seat

And you didn't even wanna die once this week  
And when you're around I feel less of a freak  
And when you smile for real you make me smile for real  
Don't care if it's night or it's day  
Let's get some coffee so we stay awake  
And when you smile for real you make me smile for real  
And when you smile for real you make me smile for real  
And when you smile for real you make me smile for real  
And when you smile for real you make me smile for real
