# Make Time

**Mallrat**

One day I'll be living in the sky
With an angel waiting at my side
One day I'll be living in the sky
With you

I'm ready
Waiting for a bus
Deadbeat
Underneath the truck
But one day I'll be living in the sky with you

Things that we forget to mention
Screaming loud to get attention
Above clouds and air pollution
Real as oceans, as resolution

Started losing it's appeal
And I just don't like sitting still
The Beatles that he tried to kill
All grew up on my window sill

Man this whole was a hotel room
I just hope you'll be home real soon
It's getting dark and getting cold
I'm getting tired you're getting old

Started losing it's appeal
And I just don't like sitting still
The Beatles that he tried to kill
All grew up on my window sill

Man this whole was a hotel room
I just hope you'll be home real soon
It's getting dark and getting cold
I'm getting tired you're getting old

Started losing it's appeal
And I just don't like sitting still
The Beatles that he tried to kill
All grew up on my window sill

Man this whole was a hotel room
I just hope you'll be home real soon
It's getting dark and getting cold
I'm getting tired you're getting old

One day when the day when the party's over
All your friends will be real sober
You'll make time for me
You'll make time
You'll make time for me
You'll make time

One day when the day when the party's over
All your friends will be real sober
You'll make time for me
You'll make time

You'll make time for me
You'll make time
