

We were trying to get by, but we can't breathe in fire  
Dispensing venom in my next of kin

How does it feel?  
Axing free will  
No more options  
Commit arson

Now we know that you're the reason for to why we suffer  
Just consider yourself as one lucky motherfucker  
It will all catch up to you one day, sir  
Don't you look so smug, it's done, now you'll burn

You can close all the blinds, people still look inside  
Know you heard what we said, so pay our rent  
We can tear your house down, big bad wolf in the ground  
After all that you've done, you poisoned the town  
Bet you thought you could run, no days left, now you're done

You can't conceal  
It got revealed  
Now it's open  
Vengeance chosen

Now we know that you're the reason for to why we suffer  
Just consider yourself as one lucky motherfucker  
It will all catch up to you one day, sir  
Don't you look so smug, it's done, now you'll burn
