MAN WITH A MISSION

What is it now that you can see
After all you gained and lost in lifetime
What is it now that you conceive
With the false and pain that's always in your mind
Inevitable things are on the way
And everything is so complex to me
Would you believe could you believe
It was the answer and the remedy

One by one the days that we recall
Took an oath and crossed our fingers
Up and up we keep on climb the wall
To dedicate our soul until the end
Every history and your life is made
Proven and told by your scars and blisters
All the glitter and the bitters come back around again

Here we are once again
The reckless scheme of ours
Spinning the wheel it all circulates
Spinning the wheel in all circulation
Fear no more nor lament
Your life is beautiful
Spinning the wheel it all circulates
Spinning the wheel for our innovation

What is it now that we can see
After all we went through in our lifetime
Would you believe could you believe
We had the answer and the remedy
Up and up we keep on climb the wall
Every night we dreamed and lingered
All the glitter and the bitters come back around again

Here we are once again
The reckless scheme of ours
Spinning the wheel it all circulates
Spinning the wheel in all circulation
Fear no more nor lament
Your life is beautiful
Spinning the wheel it all circulates
Spinning the wheel for our innovation

We've all been looking for a reason
We've all been losing in the game
We all know it is never even
But everything is gonna be ok

We've all been looking for a reason
We've all been losing in the game
We all know it is never even
But everything is gonna be ok

Here we are once again
The reckless scheme of ours
Spinning the wheel it all circulates
Spinning the wheel in all circulation

Fear no more nor lament
Your life is beautiful
Spinning the wheel it all circulates
Spinning the wheel for our innovation

The reckless scheme of ours
Fear no more nor lament
Cause life is beautiful
Yeah life is beautiful
Spinning the wheel it all circulates
Spinning the wheel in all circulation
Spinning the wheel it all circulates
Spinning the wheel for our innovation
