

# Falling

## MAN WITH A MISSION

Now where are you going so fast  
No doubt reality bites  
And lots of trouble is on your way in sight

When you're wondering off your way  
Anxiety will catch you so easily and tame  
Even all the great one's are the same

Clear your situation among those people and the blue  
For every worthless estimation is all they care about today not you

Sink down to the bottom  
Take a breath to feel it deeper

I'm falling  
Where you've never been to  
Just believe in Exhale the strength to find what you are  
Falling Days and ways you've gone through  
Now your seeing  
How to find yourself You own your life  
Cast away the fear and hold on tight  
Wow Wow Wow  
And get back what you are

Why make all the borders between  
Don't say we're not the same  
In time we're all together in the end

Let us wonder to seek our way  
Let them laugh as you go but don't even care  
Cause there's more important things to share

Clear your situation among those people my old friend  
For every faith you still believe is  
All you need to live today again  
Sink down to the bottom  
Take a breath to feel life deeper

I'm falling  
Where you've never been to  
Just believe in Exhale the strength to find what you are  
Falling Days and ways you've gone through  
Now your seeing  
How to find yourself You own your life  
Cast away the fear and hold on tight  
Wow Wow Wow  
And get back what you are

Walking around without a breath  
I dropped a lot of flops regrets  
Run through the field of love and hate  
On the edge of choking I was there

Now I know how to escape my bind  
Smash down all walls around of you to give yourself  
The clarified visions of the brave over there

I'm falling  
Where you've never been to  
Just believe in Exhale the strength to find what you are  
Falling Days and ways you've gone through  
Now your seeing  
How to find yourself You own your life  
Cast away the fear and hold on tight  
Wow Wow Wow  
And get back what you are
