The World's On Fire

MAN WITH A MISSION

Here we are standing on the edge
Here we are right behind the end
Can't believe in what I see

But they keep saying let it be

Wind it back backwards to the start
To the day before it fell apart
Something's wrong with everything
But waiting for that chime to ring

Oh yeah the people come together
Hoping that this time it lasts forever
This time we will never let it go

Cause the world's on fire

There it goes another satellite
No one knows today what's wrong or right
Nature crying everywhere
But they keep saying we don't care

And again the song will rule the night
Cause we have the will to stand and fight
We might be behind the end
But one day we will laugh again

Oh yeah the people come together
Hoping that this time it lasts forever
This time we will never let it go

Cause the world's on fire
The world's on fire

Will we find the answer on this road
No matter where we go It just goes on and on

This time it's forever
The world is gone but we're together
This time it's forever
The world is gone

We're on fire
We're on fire
The world's on fire
The world's on fire
The world's on fire
