## **Bring the Ruckus**

Manafest

I'm going out with a crash Tear it up with my past If you want it Bring the ruckus Turn it up a notch You want to see me burn, but burning up your barns and vermin I'm busting verses and rehearsing for your burial I'm doing cartwheels and aerials Get out my way before I bury you Carry you, out of my face is the scenario, Telling you to come and bring the ruckus,

You can try but you won't take me down I'm standing on my ground As all the fear inside me fades away

You can try to get a reaction But you're no distraction to me Bring the ruckus to me, bring the ruckus, bring the ruckus to me, Bring the Ruckus

This ain't the first or the last I'm pistol-whipping the track If you want it, come and get it You can't walk my path I'm burning wholes in you, better run When you gonna learn Loaded weapons unloading on you With every word Shake you down into a misery, history Know my enemy you're not a friend of me fade away Forever my time, all stars shine. Telling you to come and BRING THE RUCKUS

You can try but you won't take me down I'm standing on my ground As all the fear inside me fades away

You can try to get a reaction But you're no distraction to me Bring the ruckus to me!

Bring it on I will be your enemy Head strong you don't want to fight with me

Bring it on I will be your enemy Head strong you don't want to fight with me

Bring it on I will be your enemy Head strong you don't want to fight with me

Bring it on I will be your enemy Head strong you don't want to fight with me
