

Come Back Home

Manafest

Took a trip to the dark side
Drift off and I'm gone for a long ride
Get lost in my thoughts in the moonlight
All night I'd pray but I'm tongue tied
Swung high, when I hit low
Won't die, I'm in a fight with a pit-bull
Sunrise won't shine in my window
Choose sides I sing from a hymnal

I wanna turn in reverse
Pull my dreams from the dirt
Plant my feet in the earth
I keep making it worse
I wanna go back to church
But I'm so lost it hurts
Wanna wash my soul first
And say the right words
I wanna come home

Come back home, I've been right where you left me
I left the light on and I've got everything you need
If you come back home, I'll lift your heaviness
Just lay your head down, child, I've got everything you need

Should of listened mamma, this is drama
Keeping my distance, missing father
Slipping and I trip, drifting farther
Spinning wanna quit, living darker
In my heart hollering

In the dark I'm wallowing
Calling to be honest
I'm willing to make a promise

Wanna turn in reverse
Pull my dreams from the dirt
Plant my feet in the earth
I keep making it worse
Wanna go back to church
But I'm so lost it hurts
Wanna wash my soul first
And say the right words
I wanna come home

Come back home, I've been right where you left me
I left the light on and I've got everything you need
If you come back home, I'll lift your heaviness
Just lay your head down, child, I've got everything you need

God, give me the strength to be everything I know you've call me to be
If it's not too late, I want to turn this thing around

Come back home, I've been right where you left me
I left the light on and I've got everything you need
If you come back home, I'll lift your heaviness
Just lay your head down, child, I've got everything you need
