

## Encore

Manafest

I'm in love, I don't wanna say goodbye  
Don't rush, stay for one more ride  
I'm catching on your vibe  
Don't go, leave with a piece of my heart  
We're not done, I can't see us being apart  
I'm catching on your vibe

So give me an encore  
Give me a chant  
Because I'll give you one more chance  
To make the night last, make it last  
We've gotten far and far and fast  
So give me an encore  
Give me a chant  
Because I'll give you one more chance  
To make the night last, make it last  
We've gotten far and far and fast

You were too beautiful to let go  
Stay close, let it once as I go off  
The walls will come alive (Come alive)  
Right now show me everything you got  
Get loud, this is our time to rock  
This is our time to rock

So give me an encore  
Give me a chant  
Because I'll give you one more chance  
To make the night last, make it last  
We've gotten far and far and fast  
So give me an encore  
Give me a chant  
Because I'll give you one more chance  
To make the night last, make it last  
We've gotten far and far and fast

Give it up, give it up now, raise your eyes to the clouds  
Wave your hand in the cloud  
Our time's running out  
Live it up, live it up now, that's what we're all about  
If you have any doubt  
Let me turn it around

So give me an encore  
Give me a chant  
Because I'll give you one more chance  
  
So give me an encore  
Give me a chant  
Because I'll give you one more chance  
To make the night last, make it last  
We've gotten far and far and fast  
So give me an encore  
Give me a chant  
Because I'll give you one more chance  
To make the night last, make it last  
We've gotten far and far and fast

So give me an encore  
Give me a chant  
Lift the sky with all our hands
