

It's Not Over

Mandisa

You're right here
In the questions
In the quiet
You're still speaking

You're out here
In the unknown
In the lowest low
You're still reaching

Nothing lost and nothing wasted
I'm steady in Your hand
Even now You're orchestrating
A miracle

It's not over
It's not over
It's not over
You'll finish what You started
It's not over
Something good is coming
It's not over
You'll finish what You started
What You started in me

You're right here
In the tension
In this season
You're revealing

You're the breakthrough
And the answer
Every promise
All my healing

It's not over
It's not over
It's not over
You'll finish what You started
It's not over
Something good is coming
It's not over
You'll finish what You started

Even when my heart can't understand
You still have a future and a plan
Even when my heart can't understand
By faith I will believe that
You still have a future and a plan
For me and You'll complete it

It's not over
It's not over
It's not over
You'll finish what You started
It's not over
Something good is coming

It's not over
You'll finish what You started
It's not over
You'll finish what You started
