

# Get Down

Mando Diao

Here comes the night  
And in darkness I conceal  
All I think and all I mean  
I'm growing tired  
Of feeling I should hide, inside  
So I wont run  
I'll see how this turns out  
Try to figure out what it's all about

Get down smash the window  
Get down turn the key  
Get down true and loving  
No more drama no more misery

Get down smash the window  
Get down turn the key  
Get down true and loving  
No more drama no more misery

For all my life I've been searching for a home  
Somewhere where I don't have to be alone  
But it's so hard finding shelter in this world  
But here's something that you've never heard

Get down smash the window  
Get down turn the key  
Get down true and loving  
No more drama no more misery

Get down smash the window  
Get down turn the key  
Get down true and loving  
No more drama no more misery

Get it out, get rid of the darkness  
Loose your self, get it out, get rid of everything  
You know in our times we used to say get down, come on

Get it out, darkness get it out  
Get it out, darkness get it out  
Get it out, darkness get it out

Get it out, darkness get it out  
Get it out, darkness get it out  
Get it out, darkness get it out

Get down smash the window  
Get down turn the key  
Get down true and loving  
No more drama no more misery

Get down smash the window  
Get down turn the key  
Get down where stories will be untold  
No more drama no more misery

Get down smash the window

Get down turn the key  
Get down true and loving  
No more drama no more misery
