

## Golden Embers

Mandolin Orange

Just like an old friend, kinder than expected  
That Cadillac came and gave our girl a ride  
Loss has no end, it binds to our connection  
We don't speak of it, we don't even try

If you could help me to share the trouble  
But you've got burned and then you, then you can help me  
And in our time together, her memory will ever  
Shine like golden embers in the night

I miss the old hymns when she used to sing  
The sparrows spread their mortal wings  
Now they've all lighted with the silence of strings  
Like notes on the pages, she breathed life into all things

If you could help me to share the trouble  
But you've got burned and then you, then you can help me  
And in our time together, her memory will ever  
Shine like golden embers in the night

Just like an old friend, reach out to me  
Bathe me in the light of understanding  
Try to help me to share the trouble  
But you've got burned and then you, then you can help me  
And in our time together, her memory will ever  
Shine like golden embers in the night
