Fire

Manic Drive

Get your flame, get your flame, and radiate
With a spark, we can start to luminate

I'll pass the torch
We spread like wildfire
Escape the darkness
Across this universe, shine brighter than a shooting star

Burn up the night
I come together and blaze up the sky
Let's set this world on fire, fire
Let's set this world on fire, fire
Watch us ignite, they can't contain us
As we unite
Let's set this world on fire, fire
Let's set this world on fire, fire

A million flares in the air throughout the night
We show the way, show the way, the truth, and life

I'll pass the torch
We spread like wildfire
Escape the darkness
Across this universe, shine brighter than a shooting star

Burn up the night
I come together and blaze up the sky
Let's set this world on fire, fire
Let's set this world on fire, fire
Watch us ignite, they can't contain us
As we unite
Let's set this world on fire, fire
Let's set this world on fire, fire

Till all I've burn out, in You we will trust
From ashes to ashes, dust to dust
Your flame carries through generations to come
Light this world, light up like the sun
So burn up the night
Blaze up the sky
(Let's set this world on fire, fire)
We set this world on fire

Burn up the night
I come together and blaze up the sky
Let's set this world on fire, fire
Let's set this world on fire, fire (Let's set this world on)
Watch us ignite, they can't contain us
As we unite
Let's set this world on fire, fire
Let's set this world on fire, fire

We show the truth and light (Burn up the night)
We show the truth and light (Blaze up the sky)
We show the truth and light (Burn up the night)
We show the truth and light (Blaze up the sky)
When we burn like, burn like a fire
