

# Astronomica

Manilla Road

Under the stars  
It's written in the cards,  
All the myths that bards  
Have sung through history

The future's not so cold  
Just trust the ways of old  
Magik can save the soul  
And set the spirit free  
It's not just fantasy

Heavenly bodies,  
Astrological minds,  
Seeking out the wisdom  
Of the stars at night,  
To snatch from the heavens  
The thunderbolt of light  
And then the sceptre  
From the tyrant's side

Night after night  
They shine on so bright,  
All the ancient lights  
Shall never fade away

Astronomica!  
The laws that bind us all  
To keep us from the fall  
Unto the stars we gaze  
And pray

Living for the future,  
Living for the night,  
Living for the masters,  
Holy guardians of light

Jupites is rising  
Over the table round,  
Sword of fire and Lightning  
Ancients Rites have found.

Fight after fight  
They shine on so bright,  
All the ancient knights  
Shall never fade away  
Astronomica!

The laws that bind us all  
To keeps us from the fall  
Unto the stars we gaze  
And pray

Universal wisdom  
Of the Gods of old;  
A conquerer's freedom  
Is the danger zone

Astromomic wasteland  
Darkened and cold  
Where the new born King stands  
With sword of the throne

Night after night  
They shine on so bright  
All the ancient lighths  
Shall never fade away

Astronomica,  
The laws that bind us all  
To keep us from the fall  
Unto the stars we gaze  
And pray.
