

## Glory Verse

Maps

I heard that now you're callin'  
Left it all behind this mornin'  
With those blocks, the ones that see you through

Like all the times before  
You made sure that they saw you  
But now you're gonna see this through

When you look down  
You know you'll see this glory verse  
What you found  
You'll tend to me as glory verse

This world could get you closer  
To what you need the most  
You'll find this chemistry could move

These sounds will never leave you  
Will be there to receive you  
These sounds, they seem to write themselves

When you look down  
You know you'll see this glory verse  
What you found  
You'll tell to me is glory verse

Before you leave from here  
Before you leave from here  
Here is really just a matter of time  
Before it happens, yeah
