

# Chaos

Marc Almond

When they say the party's over  
It's when it really begins  
So, I'm kicking out the virtues  
And saving all the sins

Go bathing in the life fantastic  
Thrilling risks when times are drastic  
Silver gold locks, simple plastic  
Always turn me on

So come alive, embrace the chaos  
We're unique, no one can play us  
You need chaos in your heart  
If you want to give birth to a dancing star  
The chaos all around me  
Age the answer round, astound me  
The world is falling down around me  
And chaos is what we are  
Embrace the chaos

Lipsey marks on the glasses  
Cigarette burns on the table  
I couldn't stop the party now  
Even if I were able

You know, live will only bring  
You down if your dreams making stable  
When all your soul is hustlers gold  
It deals under the table

So, come alive, embrace the chaos  
We're unique, no one can play us  
You need chaos in your heart  
If you want to give birth to a dancing star  
The chaos all around me  
Age the answer round, astound me  
The world is falling down around me  
And chaos is what we are  
Embrace the chaos

So come alive, embrace the chaos  
We're unique, no one can play us  
You need chaos in your heart  
If you want to give birth to a dancing star

Embrace the chaos  
Embrace the chaos  
The world is falling down around me  
And chaos is what we are  
Embrace the chaos
