

Baby, you really the prototype, you the genuine article  
The one to get the party started  
When your song is on, you let it go  
Let me know if you outside  
I swallow my pride, I keep it on the low

Bout to put a stamp on it, make you my claim  
If you shut it down, I can give you my name  
How does that sound, girl? Got a ring to it  
How does that sound, girl?  
Bout to put the stamp on it, make you my claim  
If you shut it down, I can give you my name  
How does that sound, girl? Got a ring to it  
How does that sound, baby?

Look so good when you step in the light  
All them other girls they was fly by night  
I was dead wrong, but I'm tryna go right  
I promise girl, I promise, promise

When I'm alone in my room  
Head like a balloon  
Inflated from the feelings of you  
Concentrating on the work that I do  
The clock says 11:11  
You got til 2:22 to get your shit together  
Before she get brand new  
Feel like you fumble heaven  
Well, the hellboy loose  
Out with the squad already  
I smashed that girl you knew  
I was just being petty  
You know me at my worst  
Baby, I think you ready

Bout to put a stamp on it, make you my claim  
If you shut it down, I can give you my name  
How does that sound, girl? Got a ring to it  
How does that sound, girl?  
Bout to put the stamp on it, make you my claim  
If you shut it down, I can give you my name  
How does that sound, girl? Got a ring to it  
How does that sound, baby?

Look so good when you step in the light  
All them other girls they was fly by night  
I was dead wrong, but I'm tryna go right  
I promise girl, I promise, promise

Promise, promise  
I promise girl, I promise, promise

Promise, promise  
I promise girl, I promise, promise
