

## Closer

Marc E. Bassy

There's a jungle out there they say  
Filled with superstition  
Get on your knees and pray  
If you pay maybe she'll listen  
It's a struggle out there they tell me  
Love comes with conditions  
I tried to send a solution  
But it got lost in transmission  
So, so so so so many times  
I fell for the same things twice  
So, so so so so many times  
I forgot my own advice

But the closer I get to you baby  
The closer I get to know myself  
The closer I get to you baby  
The more that I don't need no one else  
The closer I get, the closer I get

It is what it is, you tell me  
Like nobody ever changed my mind  
I'm too high to get my own place  
I'm too scared to leave my own place behind  
So, so so so so many times  
I fell for the same things twice  
So, so so so so many times  
I forgot my own advice

But the closer I get to you baby  
The closer I get to know myself  
The closer I get to you baby  
The more that I don't need no one else  
The closer I get

But the closer I get to you baby  
The closer I get to know myself  
The closer I get to you baby  
The more that I don't need no one else  
The closer I get, the closer I get
