

Express My Love

Marc E. Bassy

I feel the desire, hearts on fire
Never in love, but I'm feeling your touch
Went through the motions, sailed over oceans
Only to find, you were there the whole time

Now I'm in too deep, and my heart skips beats
I can't get no sleep, I need you by me
Express my love, undress my love baby
If I press my luck, would I mess this up
Yea I just express my love, and confess my love baby
Would it be too much, if I express my love baby

I walked through the riots, trying to fight it
Blew through the options, but you were the constant
Finally can face it, had to embrace to it
Why would I waste it, you're so amazing

I think I'm in too deep, and my heart skips beats
I can't get no sleep, I need you by me
So let me express my love (express my love), undress my love baby (undress my love)
If I press my luck (press my luck), would I mess this up (mess this up)
Yea I just express my love (express my love), confess my love (confess my love)
Would it be too much (be too much), if I express my love baby (express my love)

Express my love (express my love), undress my love baby (undress my love)
If I press my luck (press my luck), would I mess this up (mess this up)
Yea I just express my love (express my love), confess my love (confess my love)
Would it be too much (be too much), if I express my love baby (express my love)

I feel the desire, hearts on fire
Never in love, but I'm feeling your touch
Went through the motions, sailed over oceans
Only to find, you were there the whole time
