

Moonlight

Marc E. Bassy

I've been right there for you baby
When you need me
Oh you got me
And I've been tried and true baby
Believe me
Come and see me
Look in my face
And my heart starts to race
When you come around
Leaving no trace
Of the scars that I made
Let the sun go down

I want to see you in the moonlight
Pulling us together like a slow tide
Wanna see your body in the moonlight
Waves will make us crash back home
I want to see you in the moonlight
Pulling us together like a slow tide
Wanna see your body in the moonlight
Waves will make us crash back home

City nights we run together
Feel the cold breeze
Come and hold me
The deeper that we dive
The better
I was lonely
Till you showed me
Look in my face
And my heart starts to race
When you come around
Leaving no trace
Of the scars that I made
Let the sun go down

I want to see you in the moonlight
Pulling us together like a slow tide
Wanna see your body in the moonlight
Waves will make us crash back home
I want to see you in the moonlight
The moon moon light baby
A slow tide
The slow slow tide
Moonlight
Waves will make us crash back home

Run away with me baby
With me baby
Come run away with me baby

I want to see you in the moonlight
Pulling us together like a slow tide
Wanna see your body in the moonlight
Waves will make us crash back home
I want to see you in the moonlight
The moon moon light baby

A slow tide
The slow slow tide
Moonlight
Waves will make us crash back home

I've been right there for you baby
When you need me
Oh you got me
