

# You Pour Up Mine

Marc E. Bassy

I got habits, baby it's evident  
Everywhere that you look it's evidence  
Paraphernalia, enough to kill you  
That's the way that I become somebody realer  
I like it when you're in the mood to drink tequila  
Like when you throw on that Kehlani and you think of me  
It was good, until it wasn't, but you can't breathe

After all this  
I'm the one that make you cum quick  
I'm the one that make you crack smiles  
I'm the one that make you get wild  
After all that  
You the one that make me fall back  
You the one that keep me in line  
Baby after all this time

You pour up mine  
You pour up mine  
You pour up mine  
You pour up mine

You got habits baby, it's obvious  
That designer give you an audience  
All that attention  
To get a mention  
That's the reason you be tannin' in a mansion  
I like it when we turn to ghosts in the phantom  
Like when you dancin' in the mirror to that Lauren Hill  
But that X factor ain't really the way you feel

After all this  
I'm the one that make you cum quick  
I'm the one that make you crack smiles  
I'm the one that make you get wild  
After all that  
You the one that make me fall back  
You the one that keep me in line  
Baby after all this time

You pour up mine  
You pour up mine  
You pour up mine  
You pour up mine

Got a pass baby, who doesn't though  
Don't act like you didn't know I was a hoe before  
Don't act like I didn't meet you at somebody's show  
Don't act like you didn't grab me, say it's time to go  
Make a toast to the women that can do the most  
Round trippin', just to spend a weekend on the coast  
Got your number in my phone, saved this when in Rome  
If you ready girl, I think that we can bring it home

After all this  
I'm the one that make you cum quick  
I'm the one that make you crack smiles

I'm the one that make you get wild  
After all that  
You the one that make me fall back  
You the one that keep me in line  
Baby after all this time

You pour up mine  
You pour up mine  
You pour up mine  
You pour up mine
