

## All For Me

Mariah the Scientist

'42 on my body (Mm-hmm)  
Then these feelings get to talkin'  
Headed out of the party  
And I know you see me callin'  
But maybe you're with someone else  
Tonight you are not mine  
But baby, if you change your mind  
Now I'll slide  
'Cause you're only five minutes up the road (Mm-mm, mm-mm)

And I don't think I'll make it home (No-oh, oh-oh, no-oh, oh-oh), hey  
'Cause I can't spend another night alone

What does she have on me?  
What does she have? (What does she have? What does she have?)  
She isn't half of me  
I'll make it last (I'll make it last, last, last, I'll make it)  
And in eternity I'll need a second chance (A second chance, a second chance)  
I need it all for me, yeah

I need you to cry for me  
Cry, cry for me (Cry, cry)  
Pull up on me and spend the night with me  
I need your eyes on me (Yeah, yeah)  
All eyes on me (All eyes)  
All your attention, boy, I thrive on it  
Baby, if you're with someone, just let me know  
Yeah, yeah (Yeah, yeah)  
'Cause baby if you're with someone, she gotta go  
'Cause I'm only five minutes up the road

And I don't think I'll make it home (Home), hey  
'Cause I can't spend another night alone (Alone)

What does she have on me?  
What does she have? (What does she have? What does she have?)  
She isn't half of me  
I'll make it last (I'll make it last, last, last, I'll make it)  
And in eternity I'll need a second chance (A second chance, a second chance)  
I need it all for me, yeah
