

Wildfire

Marié Digby

Sometimes a kiss, is just lips on lips
And other times, it lights your insides on fire
Sometimes a touch, is just skin on skin
A beautiful illusion or a perfect line of music
But when you touch me, when our lips meet...

It's like a wildfire
You light me up and it just burns higher
Can't control it
Even if I wanted to, baby I don't want to
And as it burns down
Watch the whole world fade out
Can't stop it now
Even if we wanted to, baby I don't want to

It just takes one night
To watch it all change
Strangers become lovers
Don't know how to live without each other

Some people's stars, they align
But our stars, they collide

Like a wildfire
You light me up and it just burns higher
Can't control it
Even if I wanted to, baby I don't want to
As it burns down
Watch the whole world fade out
Can't stop it now
Even if we wanted to, baby I don't want to

So many faces, so many places, so many things I'll never know
But with you, the rules go up in smoke

Like a wildfire
You light me up and it just burns higher
Can't control it
Even if I wanted to, baby I don't want to
As it burns down
Watch the whole world fade out
Can't stop it now
Even if we wanted to, baby I don't want to, want to, no
Even if we wanted to, baby I don't want to
