

Let Me Be the First

Marie Osmond

Let me be the first one in your life
To never make you cry
Let this be the first time you believe
That love will never leave
Take a chance on me tonight
It's not too late to do it right

Let me be the first
The first to make it last
Let me be the first
Don't give up so fast
Let me be the first
Forget the past
Let me be the first
The first to make it last

You've had other lovers in your arms
Who only did you harm
Now while your heartache is history
You know you're safe with me
We're the only ones who matter
What you want is what I'm after

Let me be the first
The first to make it last
Let me be the first
Don't give up so fast
Let me be the first
Forget the past
Let me be the first
The first to make it last

I've waited all my life to find you
Put your broken dreams behind you
We've got a reason to be together
This kind of feeling could last forever

Let me be the first
The first to make it last
Let me be the first
Don't give up so fast
Let me be the first
Forget the past
Let me be the first
The first to make it last
