

## What's a Little Love Between Friends

Marie Osmond

Glad you called  
Wanted to talk  
Isn't that what friends are for?  
Hours ago we didn't know  
A conversation could lead to so much more

Moonlight snuck right up behind us  
How could we know  
That love would find us and blind us

What's a little love behind friends  
Some unexpected feelings  
What's a little love  
A little change of heart  
Let's keep on touching this way  
No need to be afraid  
To go somewhere we've never been  
What's a little love between friends

How many years of lovers and tears  
Have we pulled each other through  
Now what a surprise  
To look in two familiar eyes  
And discover something new

You and me  
Ending up together  
That's what I call making a good thing better  
So much better

What's a little love behind friends  
Some unexpected feelings  
What's a little love  
A little change of heart  
Let's keep on touching this way  
No need to be afraid  
To go somewhere we've never been  
What's a little love between friends
