

# Saturnalia

Marilyn Manson

When all your demons die  
Even if just one survives  
I will still be here to hold you

No matter how cold you are  
No matter how cold you are

I see the terror in your teardrop  
Take your belief  
Make it snow, let go  
And wait together until we thaw

I don't wanna be another bullet hole  
In the exit sign on your road  
I don't wanna be another bullet hole  
In the exit sign on your road

Just smile like a rifle  
Hot metal in the setting sun  
Just smile like a rifle  
Hot metal in the setting sun

I was invited to eat the young  
I was invited to eat the young

Starting, possession, symbolic firearms  
In the bottomless celebrity scars  
Starting, possession, symbolic firearms  
In the bottomless celebrity scars

I don't wanna be another bullet hole  
In the exit sign on your road  
I don't wanna be another bullet hole  
In the exit sign on your road

Just smile like a rifle  
Hot metal in the setting sun  
Just smile like a rifle  
Hot metal in the setting sun

I was invited to eat the young  
I was invited to eat the young

By the roadside all  
the bones picked clean  
No gas in our machine  
I will still be here to hold you  
No matter how cold you are  
No matter how cold you are

Can't stop now, no flowers to smell  
Earth ate up the Son, can't even load my gun  
It seems like Saturnalia  
Sat-sat-sat-sat-Saturnalia  
Sat-sat-sat-sat-Saturnalia

There's no exit plan

No emergency room in this tomb  
And this door only opens one way

There's no exit plan  
No emergency room in this tomb  
And this door only opens one way

Sat-sat-sat-sat-Saturnalia  
Sat-sat-sat-sat-Saturnalia  
Sat-sat-sat-sat-Saturnalia

Blinded by blackness  
Just empty shells  
In the deafening void of our last sunset

Blinded by blackness  
Just empty shells  
In the deafening void of our last sunset
