

## Dark Star

Marina Kaye

Under a dark star  
That's where you and I  
And you and I belong  
Under a night sky  
That's where you and I  
And you and I can fly

We are dreams you and I  
We're not real in the light  
I am yours, you are mine  
But we don't make it out alive

Fade away with the sun  
Wake up and we come undone  
Stay or leave  
We can't escape  
Doesn't matter where we run

Under a dark star  
That's where you and I  
And you and I belong  
Under a night sky  
That's where you and I  
And you and I can fly

We can find another way  
Yeah you know it's not too late  
We can fight for what we want  
Live or die, don't be ashamed  
We are dreams you and I  
We're not real in the light  
We can love  
We can love

Under a dark star  
That's where you and I  
And you and I belong  
Under a night sky  
That's where you and I  
And you and I can fly
