

Scream

Marina Kaye

Don't turn off the light
You'll be movie terrified
We're far from paradise
Kiss your fears goodbye
Coz I'll be on your mind
And everytime you cry
I'll sing a lullaby

So where you think you're gonna run
Fire up the smoking gun
Feel me hotter than the burning sun, this is murder
And you know that I'll be the ghost
The one that you will hate the most
So raise a glass and make a toast
Tonight I'll be the perfect host

So scream louder
Coz ain't nobody gonna hear ya
These walls are thicker than a bullet proof door
So scream louder
Coz you're the one that done fucked up
And now you're gonna pay the price and some more
More, more, more
The price and some more
Scream louder
Coz you're the one that done fucked up
And now you're gonna pay the price and some more

You seem a little scared
Think there's something in the air
I hope you came prepared, tonight
I see it in the moon
Taste the silence in the room
But you're too scared to move, it's true

So where you think you're gonna run
Fire up the smoking gun
Feel me hotter than the burning sun, this is murder
And you know that I'll be the ghost
The one that you will hate the most
So raise a glass and make a toast
Tonight I'll be the perfect host

So scream louder
Coz ain't nobody gonna hear ya
These walls are thicker than a bullet proof door
So scream louder
Coz you're the one that done fucked up
And now you're gonna pay the price and some more
More, more, more
The price and some more
Scream louder
Coz you're the one that done fucked up
And now you're gonna pay the price and some more

Something don't feel right
Put my pride aside

You look petrified oh, I know
This is dark delight
I'll give you a fright
Raise a glass and make a toast
Tonight I'll be the perfect host

So scream louder
Coz ain't nobody gonna hear ya
These walls are thicker than a bullet proof door
So scream louder
Coz you're the one that done fucked up
And now you're gonna pay the price and some more
More, more, more
The price and some more
Scream louder
Coz you're the one that done fucked up
And now you're gonna pay the price and some more
