

The Smile

Marion

Got to make headway
Cut yourself free
Make us laugh again then
Help you spend some more money
Now how do you feel?

Forget about up there and the share
For your now in exile
From this place you know as misery
So now how do you feel?

We're not composed enough to stay
And you expose us when you say
We're all smiles when you need me

Lights down, I'll help you spend some more money
Now how can you feel?
Forget about up there and her stares

And now you're missing
This place you know as misery
'Cause you know, you know how that feels

We're not composed enough to stay
And you expose us when you say
We're all smiles

We're not composed enough to stay
And you expose us when you say
We're all smiles when you need me

It's funny seeing you warming to it
You've lost yourself again
And you just had to go down to rise back higher
And you have got to stay in around

We're not composed enough to stay
And you expose us when you say
We're all smiles

In the smile, in the smile
When will you need me, need me?
Oh when will you lead me, lead me?
When will you need me?
