

## It's Us Again

Mark Ambor

Play by the rules and just keep quiet  
There's half a chance that you'll survive it  
Cause on top and looking down it's always satisfying  
Till you're gone, and your words just echo here

This never ends, you try to drop it  
Don't turn your head, we won't be stopping  
The broken pieces will bend  
You can't go on and pretend  
Come get the door, you know who's knocking  
It's us again

Hope your house floats when we're all swimming  
Teasing your love but never give in  
You'll switch up the scene so we all think we're always winning  
Till you're gone, and your words are all we hear

This never ends, you try to drop it  
Don't turn your head, we won't be stopping  
The broken pieces will bend  
You can't go on and pretend  
Come get the door, you know who's knocking  
It's us again

What you think is killing me, maybe you're just crazy  
Fall asleep, let it be, maybe I'm just crazy

What you think is killing me, maybe you're just crazy  
Fall asleep, let it be, maybe I'm just (really)

This never ends, you try to drop it  
Don't turn your head, we won't be stopping  
The broken pieces will bend  
You can't go on and pretend  
Come get the door, you know who's knocking  
It's us again
