Time Don't Stop

Mark Battles

(Yung1, you a fool for this one)

I woke up the same me but a different man
Ain't you sick and tired of stressing, Mark, it's time to live again
Hey, shout my nigga Yung, been my bros since we was young
Helped me grow since we was young
Didn't fold since we was young
Now it's time to hit up coach, need some plays that we can run
It's been all about the funds, I'm no longer having fun
24, I got bored, 25, I'm going dumb
Life stripped me where the ones? Pump the breath back in my lungs
Bitch, I need more
Each day I'm walking on shells like a sea floor
Watch for the detour, play the game, keep score
And when you falling, please be careful who you reach for
Took off the Jeep doors, this album is my heat source
Hit the Louis store, act a donkey, Eeyore
She love me for Dolce Bana decor
How could I sleep more when I'm the only resource?
Damn

Tick-tock, know the time don't stop
When you got no more to give (Got no more to give)
So go'n 'head, lil' nigga, get your bread
'Cause it's only one life to live
It's one life, one life
Tick-tock, know the time don't stop
When you got no more to give (No more to give)
So go'n 'head, lil' mama, get your bread
'Cause it's only one life to live
It's one life, live

It's hard to open up your mind when your stomach crying
Half my life up in the trenches, all my niggas dying
Forget my pride, pray to God 'cause I need a sign
But I be scared, life ain't fair, look what it did to Bryant
R.I.P to Kobe, Apple Duck, I miss you, brodie
Only time I feel alive is when I'm with the homies
Or when I'm with the kids, super dad get to know me
I still can drive right through my hood, bitch, I don't need a chauffeur

Tick-tock, know the time don't stop
When you got no more to give (No more to give)
So go'n 'head, lil' nigga, get your bread
'Cause it's only one life to live
It's one life, one life
Tick-tock, know the time don't stop
When you got no more to give (No more to give)
So go'n 'head, lil' mama, get your bread
'Cause it's only one life to live
It's one life, live
