G Am
Gonna build a rocket

Em
Anytime you want it

G Am
Paint it pretty colours

Em Am
Gonna light it up and take us to the moon

C
That's what I'm gonna do
That's what I'm gonna

Save up all the papers
Gonna need litter
Maybe take a minute
To get in my head directions all the way
You want to get away
I'm taking you

Em G
Through the eyes of the black hole

D C
And the open doors

C Am
Through the cracks in the pavement
In conversation

Em G
From the top of the empire

D
To a state unknown

C
If I say that I'm leaving
Just got to hang on

C Am Em
'Cause we're just stars

D C
Tryna get back to where we're from

Am Em
And one by one

D C
We're gonna leave this planet

Am Em
So don't look back

D C
'Cause you know that it's all just time

Am Em
When you've got nothing on your mind

D
You made it

G
Somewhere in the future

Em

Talk about forever

G **Am**

Take yourself a picture

Em **Am**

Waiting in the rain for a postcard from the sun

The one that never comes

C

The one that never shows

The one that never, is building something

Em **G**

From the heart of the wreckage

D

In another zone

C

Are we losing our balance?

Em

I think we've got vertigo

G

From the top of the empire

To a state unknown

If I tell you I'm leaving

Just got to hang on
