

Far Away

Mark Tuan

Guess we'll never really know what it could have been
But you're feeling so alone when you're dreaming
And I heard that you've been doing even worse I believe it
And I'm done with all your promises so baby you can keep it

So when you get lonely
And you're frozen too
Just remember what I did for me and you

I gave you one last chance
And you fucked it up
Now you're far away
And I hope
That you know
That its where you'll stay
I drink too much
And I hear your voice
Calling from far away
From far away

Are you really ever there, am I losing it?
All the letter that you sent never made sense
So I wrote you back I was hoping you would see it
But the more I think about it girl I hope you never read it

So when you get lonely
And you're frozen too
Just remember what I did for me and you

I gave you one last chance
And you fucked it up
Now you're far away
And I hope
That you know
That its where you'll stay
I drink too much
And I hear your voice
Calling from far away
From far away

I try to forget
And somehow I'm reminded
About those times we used to
Share but now I choose to ignore
And it's so painful
But I don't mind this pain for
You but it's impossible
We threw it all away for what

I gave you one last chance
And you fucked it up
Now you're far away
And I hope
That you know
That its where you'll stay
I drink too much
And I hear your voice

Calling from far away
From far away
