We melt like fire
Come push the button and turn me on
Give me good love, switch the siren on
Come push the button and turn me on
Trip, trip this wire
Come push the button and turn me on
Give me good love, switch the siren on
Come push the button and turn me on

I got the stars at my feet
You're a one-way letter
I know I'm fallin' too deep
No, it doesn't even matter when I
Wake up in a cold sweat, in a cold sweat
Put your hands on my body
I wanna get right in the green light, in the green light
Come say that you want me now

We melt like fire
Come push the button and turn me on
Give me good love, switch the siren on
Come push the button and turn me on
Trip, trip this wire
Come push the button and turn me on
Give me good love, switch the siren on
Come push the button and turn me on

You wanna love, wanna leave
And my heart gets shattered
The way you lookin' at me
No, it doesn't even matter when I
Wake up in a cold sweat, in a cold sweat
Put your hands on my body
I wanna get right in the green light, in the green light
Come say that you want me now
